• Degrades organic material in cracks, crevices and drain lines.

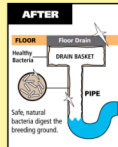

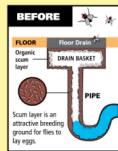

• Disrupts the habitat that flies require for reproduction.

• Removes food source for other insects, including cockroaches.

An easy-to-use
biological mopwater treatment
for commercial bars and restaurants.

Directions:
For Mopping: At the end of each day, simply drop one (1) tablet into the mop water prepared with water or with the soap or cleaner of your choice. Allow 2-3 minutes for the effervescent tablet to dissolve. Mop floor normally, focusing on cracks, crevices and spaces under equipment. When mopping is completed, pour the mop water into the open floor drains, if possible, pour equal amounts of mop water into each drain.

For Direct Application: Fill a new spray bottle, (one quart or more) with water. Drop in one tablet and allow the effervescent tablet to dissolve. Spray directly into the areas that are not in contact with the mop bucket such as bar drains, sinks and other areas that have cracks and crevices that cannot be cleaned by conventional methods.

For Best Results:

- Mix with biodegradable and environmentally friendly cleaners
- Use Mop 'n Treat at the end of the day. DO NOT rinse after or use anti-microbial products immediately after application
- Do not mix with extreme pH cleaners
- Do not exceed manufacturers application recommendation for bleach and/or harsh cleaners
